

## Setting up connection to camera through VLC Player

offer your customer benefits that cost you nothing

 <p>POE-200CAM v2</p>	 <p>SPUSTIT MJPG</p>	
 <p>OD-600HD</p>	 <p>SPUSTIT H264 SPUSTIT MPEG4</p>	
 <p>POE-200HD</p>	 <p>SPUSTIT H264 SPUSTIT MPEG4 SPUSTIT MJPG</p>	
 <p>POE-250HD</p>		

### Connecting H264:

rtsp://IPADDRESS/h264/media.amp?resolution=640x480

### Connecting MPEG4:

rtsp:// IPADDRESS /mpeg4/media.amp

### Connecting MJPG:

<http:// IPADDRESS/video.mjpg>

### Connecting MPEG4:

rtsp:// IPADDRESS/video.mp4

**Detect which browser your visitor use:**

Airlivecam.eu – here to support you and your Airlive products

```
include "browser.php";
```

**In case of Internet Explorer, script will call <object> tag:**

```
if (browser_detection('browser') == 'msie' ) { ?>
```

```
<OBJECT classid="clsid:E23FE9C6-778E-49D4-B537-38FCDE4887D8"
```

```
codebase="http://downloads.videolan.org/pub/videolan/vlc/latest/win32/axvlc.cab"
```

```
id="vlc" width="640" height="480" events="False">
```

```
<param name="Src" value="<? echo $ip; ?>" /> ... in „VALUE“ you will specify IP address of camera
```

```
<param name="ShowDisplay" value="True" />
```

```
<param name="AutoLoop" value="False" />
```

```
<param name="AutoPlay" value="TRUE" />
```

```
</OBJECT>
```

```
<? } else { ?>
```

**In other case:**

```
<embed type="application/x-vlc-plugin" name="video" autoplay="no" loop="no" width="640" height="480" target="<? echo $ip; ?>" /> ... in „TARGET“ you will specify IP address of camera
```

```
<script> document.video.play(); </script>
```

```
<? } ?>
```
